

# The Sporting 6 with Duckflush

One set consists of:

One 6-button Transmitter with

- Duckflush start and stop button
- Duckflush speed knob
- 6 separate Radio Receivers

Remote controlled release for all makes of clay traps.

Ideal for Sportrap, Compak and layouts where one trapper oversees several traps. Any number of birds may be thrown simultaneously.

**Duckflush** - pre-programmed with either 30, 40 or 50 bird sequence. The transmitter has extra start and stop buttons to start the flush sequence.

Every time the start button is pressed the flush sequence is re-started.

At the end of the flush a beeper sounds to mark the end of the sequence.

The speed knob allows the speed of the Flush to be adjusted.

This is handy when the number of guns is different, as for example a Two Man Flush needs to be slower than a Four Man Flush.

Each Flush will be exactly the same, so long as the speed knob is kept in the same place. This allows for prize money Flushes, with no arguments about the birds being different.

If you already own Morris Electronics Sporting 1 or Sporting 2 Trap Releases, it is unnecessary to buy new receivers. Simply re-use your existing receivers.

The Sporting 6 with Duck Flush can be programmed to fire your existing Receivers.

## Options

- **Sporting5** - as above but consisting only of 5 receivers and one 5-button transmitter, controlling 5 traps.
- **LCD** - clay counting LCD option with on/off switch.
- **Key switch** - On/off key for security and safety to allow only authorised operation of the transmitter.
